-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on ____.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.

DETAILED ACTION

Declaration

1. An executed combined Declaration and Power of Attorney was received on 28 October 2004.

Priority

2. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Drawings

3. The drawings filed on 03 September 2004 are acceptable for examination.

Specification

4. Has the component 100 been described in the specification? If so, please provide the page and line number(s).

Claim Rejections - 35 USC § 102

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

6. Claims 1 – 3, 5, 7 – 12, 14 – 17, 19 – 22 are rejected under 35 U.S.C. 102(e) as being anticipated by Okazaki et al. (US Pub. No. 2005/0281516).

Art Unit: 2851

The reference, in at least Fig. 23, has an exposure apparatus with an illumination system having plurality of light sources (may be lasers 110); a light integrator 114 comprised of rod shaped lens; condenser lens 120 for overlapping the light; the sources have a shape analogous to the shape of the region to be illuminated - Claims 2, 2, 10 - 12, 15- 17, 19, 22. A DMD modulates the light (see paragraphs [0096 – 0099]) – Claims 5, 14

The energy of the light is inherently controlled – Claims 7, 22

The condenser lens will diverge the light beams - Claims 3, 17, 21

The light rays are caused to enter an associated position with the integrator - Claim 8

Claim Rejections - 35 USC § 103

7. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

8. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Art Unit: 2851

9. Claim 23 is rejected under 35 U.S.C. 103(a) as being unpatentable over Okazaki et al. (US Pub. No. 2005/0281516).

The reference does not disclose detecting the intensity, but one of ordinary skill in the art would be motivated to detect the intensity of the light to control the exposure.

Allowable Subject Matter

10. Claims 4, 6, 13 and 18 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

11. The following is a statement of reasons for the indication of allowable subject matter: the prior art does not disclose a ratio as claimed.

Conclusion

12. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Ohmori et al. (US Pub. No. 2005/0254034) discloses an exposure device with an illumination system having plural light sources, a fly's eye integrator and a spatial light modulator.
